

Welcome to the January blog!

By Ayah and Gabriella

We hope you had a great half term.

Forest School:

Years 6, 4 and 3 have been to Forest School so we will tell you about their experience there. First, we heard from Andrea and Noan from Year 6. Noah said that it was an environmentally friendly area and Andrea said it was very good for animals.

Mary from Y4 said it was really nice because they could have their science lesson there.

They also made tables from sticks connecting from their lesson which was insulation. Aidan said they could have an enjoyable time.

Sustainable Advice:

Now the Year 6 Green team will tell us some helpful creative advice to be sustainable.

One idea a green team member has suggested is to use compost. If you have extra food from a meal, you can dispose of it in a special food waste bin, which will then be used to create compost.

To create a homemade compost, you will need the following: food scraps, sticks and water.

Another green team member has also suggested using your food bins as much as possible instead of using your average bin.

Anne Frank Learning in History:

Year 6 had a workshop about Anne Frank and did some art work or a piece of writing.

If you are not sure who Anne Frank was, here is an introduction to her. She was a Jewish girl, who was living in Germany. At 4 she moved to Amsterdam and at 13, she got her diary but she had to go into hiding in her father Otto's old business behind a bookshelf. She hid in a secret annex from the Nazis. She was hiding in there for 2 years with 7 other people. In 1944, she was discovered. Anne and her family went to a camp. There they got separated. Anne (who was 15 at the time) and her sister Margot died of typhus. Her dad found her diary and made a book.

So that's the story of Anne Frank.

Now we will tell you the poem Gabby made:

There was once a girl who was born on the 12th,

Owned millions of diaries,

Filled with facts.

At 13 she hid for 2 years,

Danger ran through her head,
Many Jews beat or punished,
But Anne Frank died of illness.
So that's our blog for the month.

Year 5 Blog Article:

Now Vera and Anoushka will tell you about their blog.

Now the Blog Squad and Green Team have joined to explain to you all on how to be sustainable.

On to what Green Team is doing: empty the bins on Monday and Thursday and making sure all electrical objects are turned off when not in use. They also make sure all things that need to be in the bin are in the right bin.

So that's our blog.

Have a nice day!
